

ENVIRONMENTAL POLICY

It is the policy of Foster Property Maintenance Ltd to meet all relevant legislation, regulation and government guidance, and where possible meet or exceed the industry's code of practice on environmental issues to limit environmental damage.

The requirements of the Environmental Protection Act 1990 are complied with where reasonable and practical.

All employees are briefed to encourage an understanding of the potential environmental impact of relevant operations carried out and how they can be minimised.

The Company focuses on minimising waste and recycling where possible and practical.

The Company pays particular attention to the safe storage, transportation and disposal of solvents and toxic or biologically dangerous materials. All waste from these types of products is disposed of via licensed operators.

The company holds a 'Waste Carriers Licence'- number ACE/109923.

The company has been externally vetted by QMS and has been accredited as being compliant with BS EN ISO 14001:2004 Environmental Management Systems.

Where possible and practical the Company seeks to use modern and environmentally friendly products. For example water based epoxies, paints, adhesives etc. The Company continually endeavours to influence clients, designers and approved sub-contractors in this direction.

It is the Company's policy to use new and efficient plant and vehicles to help to reduce pollution and to minimise fuel usage.

The majority of the Company's on site activities take place within occupied premises where minimal noise pollution is paramount. The Company's use of new and efficient plant along with sympathetic programming of noisy activities, aims to keep noise pollution to acceptable levels.
